

DATA FLOW DIAGRAM

Date	26 June 2026
Team ID	
Project Name	Rising waters
Maximum Marks	2 Marks

Data Flow Diagram

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Represents the user who enters weather and rainfall parameters and receives the flood prediction results from the system.
Rectangle with numbered header	Process	Represents the main processing steps of the Flood Prediction System, such as Input Validation, Flood Prediction using the XGBoost model, and Displaying the Prediction Result.
Rectangle (solid fill, no number)	Data Store	Represents the saved Machine Learning model (flood_model.joblib) and StandardScaler (scaler.joblib) that are loaded by the Flask application during prediction.
Labeled arrow	Data Flow	Represents the movement of data between the user, processing modules, and the trained Machine Learning model, including weather parameters, validated inputs, prediction outputs, and flood prediction results.
