

PROJECT EXECUTABLE FILES

Project Executable Files

Date	29 June 2026
Team ID	
Project Name	Rising waters
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example similar)	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

```

Flood-Prediction-System/
|
├─ app.py
├─ requirements.txt
├─ README.md
├─ Procfile
├─ .gitignore
|
├─ dataset/
│  └─ flood_dataset.xlsx
|
├─ notebooks/
│  └─ Flood_Prediction.ipynb
|
├─ saved_models/
│  ├── flood_model.joblib
│  └─ scaler.joblib
|
├─ static/
│  ├── css/
│  │   └─ style.css
│  └─ images/
│      └─ flood.jpg
|
└─ templates/
    ├── index.html
    └─ predict.html
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://flood-prediction-system-3fv8.onrender.com
Login Credentials (Demo)	Not Required (Public Access)
Platform / Hosting Provider	Render
Repository Link	https://github.com/doprajnasai/Flood-Prediction-System
Demo Video Link	https://drive.google.com/file/d/1ge_USj7l9Qq_cuNdL0xA3z13Vai-i2ux/view?usp=drivesdk

Step 4: Run Instructions

1. Clone the repository

```
git clone https://github.com/doprajnasai/Flood-Prediction-System.git
```

2. Navigate to the project directory

```
cd Flood-Prediction-System
```

3. Create a virtual environment

```
python -m venv venv
```

4. Activate the virtual environment

Windows

```
venv\Scripts\activate
```

Linux / macOS

```
source venv/bin/activate
```

5. Install dependencies

```
pip install -r requirements.txt
```

6. Run the Flask application

```
python app.py
```

7. Open your browser and visit:

<http://127.0.0.1:5000>

OR

8. Use the deployed application:

<https://flood-prediction-system-3fv8.onrender.com>

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Uses historical dataset only	Can be improved by integrating live weather APIs
2	No user authentication	Suitable for academic demonstration
3	Render free-tier may take time to wake up after inactivity	Wait 30–60 seconds for the first request
