Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	coordinated the project planning, task allocation, GitHub repository management, project integration, documentation, and ensured timely completion of all project milestones.
Overall Team Coordination Rating (1–5)	5 / 5
Any Issues During Demo	The deployed application required a short startup time because it was hosted on Render's free-tier service, which enters a sleep state after inactivity.
How Issues Were Resolved	The application was refreshed after the server became active, and the demonstration continued successfully. All project modules were also tested locally before the presentation to ensure smooth execution and accurate predictions.
